

# Bay Middle School

**The Bay Village City School District is a public school district that serves Bay Village, Ohio.**

Bay Middle School is rated above average in school quality and is making year-on-year academic improvement, including test results for all students, including disadvantaged students.

With E-Learning now so prevalent due to consequences of the pandemic, teacher Sandra Gase has implemented KAZ Type's online touch typing program for her fifth and sixth grade students. She believes that touch typing is now more essential than ever and hopes learning the skill will boost confidence and relieve the stress of her students whilst working on a computer, completing schoolwork.

**"I chose Kaz because my students will be in and out of E-Learning. We are all very disappointed that we cannot meet in person. I feel that my young 5th and 6th grade students and their parents will be able to self-reflect and monitor their progress with this typing program. I believe the clear objectives and light-hearted theme will reduce stress and boost confidence. I hope that the results will allow my students to be more efficient, less stressed and more confident when doing their schoolwork."**
